

TECHNICAL SOLUTIONS
in **STAINLESS STEEL**
and **PLASTIC MATERIALS**
for **THE DAIRY INDUSTRY**

Hygiene, reliability,
and production continuity

RACK AND TROLLEYS

SHELVING SYSTEM

THE DAIRY SECTOR

In the dairy sector, where every component must ensure the highest standards of **hygiene, resistance to washing cycles, and long-term reliability**, IFT equipment perfectly fits into production processes, ensuring operational continuity and compliance with sanitary regulations.

GRIDS

IFT SOLUTIONS:

IFT Srl designs and manufactures equipment and **structures in stainless steel and plastic materials** for milk and dairy processing

- Shelves, boards, grids, and crates in plastic material
- Stainless steel shelving systems, racks, and trolleys
- Custom equipment for new production lines or revamping projects

Each solution is developed according to the customer's production process.

IFT'S STRENGTHS

- Certified food-grade materials
- Hygienic surfaces, easy to clean and sanitize
- Custom design approach
- Suitable for any existing production lines
- Prototyping
- Technical support
- Extensive experience in the dairy industry

APPLICATIONS:

IFT solutions are used in:

- Industrial dairies
- Artisanal dairies
- Production of milk, mozzarella, and aged cheese

REFERENCES

IFT Srl has been collaborating for years with leading dairy companies, supporting clients of all sizes with reliable and customized solutions.

ABOUT US

IFT Srl – Italian Food Technology specializes in the design and manufacturing of **stainless steel and plastic equipment for the dairy industry**.

We support our customers in developing functional, reliable, and customized solutions designed to fit perfectly within their existing manufacturing processes.

Our experience in the dairy sector allows us to offer **technical expertise, design flexibility and high manufacturing quality** from single equipment units to complete supply systems.

Reliable and hygienic solution
during every stage of production
