

TECHNICAL SOLUTIONS
in **STAINLESS STEEL**
and **PLASTIC MATERIALS**
for **THE MEAT AND CURED MEAT**
PROCESSING INDUSTRIES

Strenght, safety and durability
over time

TROLLEY

THE MEAT SECTOR

Meat and cured meat processing takes place in difficult environments with **low temperatures, high humidity, and intensive washing procedures.**

Equipment must ensure mechanical strength, hygiene, and operational safety.

IFT SOLUTIONS:

IFT Srl designs and manufactures **equipment and structures in stainless steel and plastic materials** for the meat and cured meat sector:

- Reinforced stainless steel frames and structures
- Food-grade plastic boards, grids, grids with sides and crates
- Trolleys and supports for product handling
- Customized solutions for meat processing lines

Each solution is developed according to the customer's production process.

RACK

GRIDS WITH SIDES

IFT'S STRENGTHS:

- Robust and reliable construction
- Materials suitable for harsh cleaning procedures
- Certified food-grade materials
- Hygienic and easy-to-sanitize surfaces
- Solutions designed to meet specific customer needs
- Durability over time
- Prototyping capabilities
- Technical support
- Extensive experience in the sector

APPLICATIONS:

Our equipment is used in:

- Slaughterhouses
- Cured meat and charcuterie producers
- Ham production plants
- Meat production plants
